Lifan Energy Storm ESI4000iER-EFI

Electronically Fuel Injected Digital Inverter Generator

A superior model for RV Camping, Tailgating, Parties or for clean portable power around the house and for emergency power outages. The ESI 4000iER-EFI is a unique portable digital inverter generator with EFI Automotive Grade technology, which gives it a number of very useful advantages including excellent cold-weather starting and hot restarts. EFI produces excellent horsepower and improves performance at high altitude. Other EFI advantages of the ESI 4000iER-EFI model include a self-priming fuel system, exceptional fuel economy for longer run times on a tank of fuel, and cleaner emissions. The ESI 4000iER-EFI has an electric starter with remote control with a 75 foot range.

EFI Models equipped with Remote Start Key Fob (included)
