

DT-10IN MAX

The DT 10in MAX is a portable over-head electric wet saw and is designed to handle professional tile jobs. This powerful tile saw is recommended for cutting ceramic, porcelain, stone, and glass tile.

- 1 36 inch rip and 25 inch square tile on diagonal will allow users to manage large tile with ease
- 2 Powerful 15 amp motor to cleanly cut through the toughest tile
- 3 Advanced water spray system includes the Rubi Zero Dust water spray capture system to bring the finest water particles back to the tank and keep the work area clean
- 4 Machined aluminum table with overmold glides along a patented rail system with the precision demanded by tile professionals

- Large 5-gallon water tub separates waste water from sediment to extend pump life and provide cleaner water to the blade.
- The Python cooling system's adjustable height brings water directly to the cut for improved blade cooling and a cleaner cut.
- Adjustable laser guide enables fast alignment for custom diagonals, L-cuts, and non-through cuts by aligning the laser line with each mark for the cut.
- Quick-Set stand helps setup and breakdown the saw quickly while the 8 inch wheels provide mobility for the entire saw across the jobsite in one simple trip.
- Patented Python cooling system efficiently cools the blade.
- Patented rail design allows for fast table adjustments and help protect the table roller while cleaning the saw.
- Patented Easy-Ratchet stand locking system automatically locks stand in both operating and transport positions with an intuitive quick release for fast setup.
- The toolless arbor lock and onboard tool storage makes blade changing easy.
